

Foamed sheets in PP

Advantages & properties:

Attributes:

- Chemically foamed sheets
- Coextruded sheets with foamed middle layer and compact outside layers (structured)

Advantages:

- Low density (0,65g/cm³)
- Insulating properties
- Low thermal conductivity (0,10-0,15W/mK)
- Excellent sound insulation
- Low water absorption
- Cost-efficient product for various applications

Foamed sheets made of polypropylene are sheets used for lightweight design and construction. Linings for insulation in the boat and shipbuilding industry, container and apparatus engineering, inside liners in the automotive industry and the modelbuilding industry are only a few of various main application areas.

SUPPLY RANGE PP-C SHEETS FOAMED IN GREY COLOUR (SIMILAR RAL 7040)

Thickness	Length x Width
8 mm	3000 x 1500 mm
10 mm	3000 x 1500 mm
12 mm	3000 x 1500 mm
